

Aslak's guitar system by G-Lab

Band : Gizy & Groove Company from Finland

2 x GLab Guitar System Controller

- Glab's linked together, total loops 8 qty
- left side of pedalboard running SS's amp in
 - * Boss CS-3 loop1
 - * Boss PW-10 Wah loop2
 - * Boss BD-2 loop3
 - * Boss SD-1 and Boss OS-2 loop 4
- Right side of pedalboard running SS's effectloop
 - * Boss OD-20 and MXR SmartGate loop5
 - * Boss DD-20 loop6
 - * Boss DD-7 loop7
 - * Boss TR-2 loop8
- Boss Tuner TU-2 in GLab's tuner out

After GLab's right side signal out it goes to Boss RV-5 (always on) and after RV-5 I using Boss FV-500L for total volume.

Special cabling by GLab for amp channel control. All channel switching are programmed to presets by Glab's switch control.

GLab is best guitar system control what I have ever used. There is any additional hum or hiss and any additional color to your original signal. All features works well and it is also very speedy when you change preset.

Hughes & Kettner's RedBoxes are only for studio recording.

All cabling by Georg L's
